iMovie Basics

How to Edit your Movie

Getting Started

1. Turn all of the equipment on: DV deck, Miranda Box, and TV Monitor.
2. The “power” button is on the front of the computer.
3. When the computer is booting-up it will ask you to select a type of user: Vis70, Com21, or General. Choose your group and enter the password: imovie.

Creating Your Folder

1. Double click on the drive of the group you belong to: Vis70, Com21, or General.
2. Go to file (in the Menu) and select New Folder.
3. An “Untitled Folder” will appear in your drive.
Title the folder with your name and the month/day: Megan_OConnor_8/25.

iMovie Basics

How to Edit your Movie

Setting Up Your Project

1. Open iMovie by clicking on the icon at the bottom of the screen.

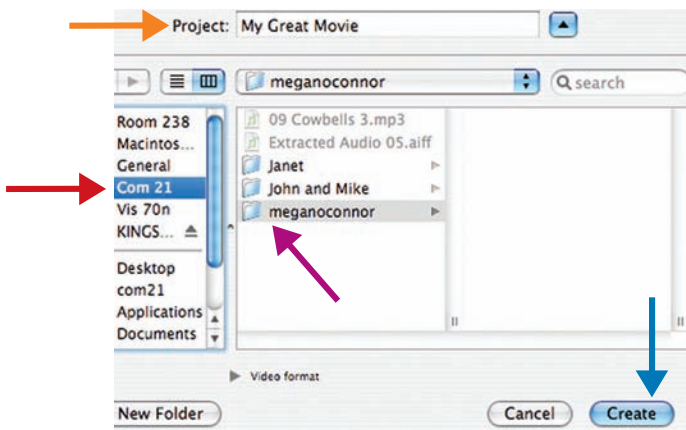

2. A dialogue box will appear. Click Create New Project, or Open Existing project if you are opening something you've been working on.

3. Type a **title** for your movie where it says **Project**.

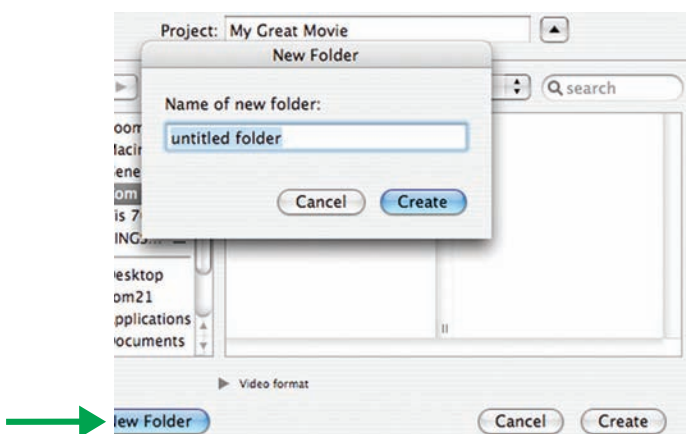

4. Select the **drive** you are using Com21, Vis70, or General.

5. Select the **folder** you created earlier titled with your name/date.

6. Click **Create**

*NOTE: If you didn't create a folder earlier you can create one inside this dialogue box, by clicking on the **drive** you want the folder to go into, and then clicking **New Folder**. Type your name/ date and then repeat steps 3-6.*

Hint! Think about the metaphors. The computer screen is like a desktop. The hard drive is like the drawers of the desk where all the important stuff is stored. Since many people use these iMovie computers there are specific drawers for different groups, and there are folders within the drawers to further organize. One of these folders will be yours!
